Dear Hiring Team,

I hope you're doing well. My name is Arslan Asad, a Software Engineering student at FAST-NUCES, Islamabad, currently in my 6th semester. I'm excited to express my interest in the Software Internship opportunity at your organization.

Over the past year, I've been deeply involved in full-stack web development using the MERN stack, where I've built and deployed projects like a feature-rich online bookstore and a job scraper API. These experiences strengthened my backend development skills, API integration abilities, and focus on writing clean, scalable code. Recently, I've also explored DevOps practices—working with Docker, Kubernetes, and setting up CI/CD pipelines using GitHub Actions—which has broadened my understanding of modern development workflows.

While classroom learning gave me a foundation, most of my real growth has come through hands-on experience—building full-stack web apps, solving real-world problems, and constantly learning through trial and error. This practical approach has helped me build strong skills in backend development, API integration, and the MERN stack.

What excites me most about this internship is the chance to work with a professional team, contribute meaningfully to real-world projects, and keep pushing my boundaries as a developer. I'm eager to learn, adapt quickly, and bring value wherever I can.

I've attached my CV for your review and would love the opportunity to discuss how I can contribute to your team. Thank you for your time and consideration.

Best regards,
**Arslan Asad**
